

## Welcome session

### Greetings from lead partner

As the world is now opening, also the INTENCIVE project partners are doing smaller bilateral study visits in the partner regions. Although project has been active in the virtual world, we can see that learning from each other is so much easier when people can discuss face to face and see the actual local setting where the Good Practices have taken place.

INTENCIVE partners have also provided altogether 25 Good Practices to the Interreg Europe Policy Learning Platform. We hope that many different stakeholders, other than just our partner regions, can benefit from them and learn from our experiences. We are now waiting for feedback from the experts on the platform. In this newsletter you can also spot many of those Good Practices which we hope can be spread out widely.

Partners are now actively working on their action plans and figuring out what kind of actions would fit their local setting. Hopefully in January 2022 we have drafts ready and partner are able to meet all in Cantabria, Spain to organize Peer-review working session.

Sanna Inkeri  
Project Manager  
Regional Council of South Ostrobothnia

Enjoy reading!

#### GOOD PRACTICES from South Ostrobothnia region
